

‘Recognising the need is the primary condition for design’ – Charles Eames

‘Design is not just what it looks like and feels like. Design is how it works.’ Steve Jobs

Design Technology Intent

In Design and Technology we are excited to **support** children in their journey to understanding how products can significantly impact the lives of others as well as the cultural wealth of the nation. Using subject specific vocabulary, children will be **encouraged** to evaluate aspects of their designs and designs of others to consider why they are successful or how its functionality can be improved. There will be **opportunities** for children to refine product-specific skills and overcome challenges that will be solved through perseverance, **collaboration** and critical thinking. As a result, children will be able to use their knowledge and imagination to design, plan, make and evaluate products that solve real and relevant **problems in the world**.

DT Overview

	Autumn term 1	Autumn term 2	Spring term 1	Spring term 2	Summer term 1	Summer term 2
Year 1 Overview	<p>Fairy Tales (mechanisms) Linked to community</p> <p>Emma Parrish- children's book illustrator (sliders)</p> <div></div>		<p>Shelter – Grandad’s Island Book (structures) Linked to industry</p> <p>Charles Mackintosh – Waterproofing (Scotland)</p> 		<p>Skills focussing on how to make a lever-Pivot (mechanisms) Linked to gardens and playground</p> 	<p>Food Technology</p> 
+ Final Outcome	Book for family hour with moving part (slider)		Shelter		Moving part lever	See Food Technology Overview
Key skills	Make simple slider		Cut, finish, join		Creating a lever, cut, join finish	See Food Technology Overview
Concept focus	Imagine, plan and create		Understanding the impact on daily life, the wider world and the cultural wealth of the nation.		Problem solving Critical thinking and evaluation	See Food Technology Overview

Year 2 overview	Card Slider and Lever (mechanisms) Linked to community 	Food Technology 	Moving Vehicle (mechanisms) Linked to gardens and playground Joel Glickman – K'Nex (USA) Ole Kirk Christiansen - LEGO (Denmark) 	Puppet (textiles) Linked to industry Margaret Steiff - Stuffed toys (Germany) 
Final outcome	A card with moving element	See Food Technology Overview	Moving vehicle	A puppet
Key skills	Apply lever and slider skills in combination Cut, finish, join, shape	See Food Technology Overview	Wheels and Axels	Threading a needle, knots, running stitch
concept focus	Imagine, plan and create	See Food Technology Overview	Problem solving Critical thinking and evaluation	Understanding the impact on daily life, the wider world and the cultural wealth of the nation.
Year 3 overview	Fabric bag (textiles) Linked to home Isaac Singer – Sewing machine (USA) Application of sewing skills 	Food Technology 	Moving Toy (mechanisms) Linked to leisure 	Packaging (structures and CAD) Linked to school Robert Gair (Scotland) 

Final outcome	A fabric bag with a decorative attachment	See Food Technology Overview	Moving toy	Box for biscuits/ product to celebrate end of year.
Key skills	Application of KS1 skills New skill (blanket stitch) Add decorative details (e.g pocket and beads)	See Food Technology Overview	Levers- with linkages or a linked lever (new skill)	Cut, join, finish, shape
concept focus	Problem solving Critical thinking and evaluation	See Food Technology Overview	Imagine, plan and create	Understanding the impact on daily life, the wider world and the cultural wealth of the nation
Year 4 overview	Pulleys (mechanisms) Linked to wider world and culture Elisha Otis – Elevator pulley (Canada) Joel Glickman – K’Nex (USA) 	Food Technology 	Jewellery (mechanisms/textiles) Linked to industry and culture Paloma Picasso - Jewellery designs for Tiffany & Co (France) 	Desk Tidy (structures and CAD) Linked to school Ole Kirk Christiansen LEGO - (Denmark)  
Final outcome	Pulley system	See Food Technology Overview	Necklace/bracelet/earrings Gift for a friend or family member	A desk tidy
Key skills	New skill- Pulley system	See Food Technology Overview	Fastenings, button holes, ties, loop	Sustainability, stability, structure

concept focus	Understanding the impact on daily life, the wider world and the cultural wealth of the nation	See Food Technology Overview	Imagine, plan and create Critical thinking and evaluation	Problem solving Critical thinking and evaluation
Year 5 overview	Food Technology 	Electrical Circuits (electrical) Linked to industry and leisure John Spinello-Game (USA) 	Garden Seat (structure) Linked to enterprise Hella Jongerius –chairs (Netherlands) 	Embroidery (textiles) Linked to home and leisure William Morris- embroidery (England) Lucienne Day – embroidery (England)  
Final outcome	See Food Technology Overview	Retrieval quiz game	Create garden seat for book character	To create an embroidery design for embroidery hoop/ handkerchief
Key skills	See Food Technology Overview	Circuits; switches/buzzers	Cut, join, finish, shape	Application of KS1 and LKS2 skills New skill (chain stitch) New skill (French knot)
concept focus	See Food Technology Overview	Problem solving	Understanding the impact on daily life, the wider world and the cultural wealth of the nation	Imagine, plan and create Critical thinking and evaluation
Year 6 overview	Gears (mechanism) Linked to wider world and enterprise Joel Glickman – K'Nex (USA)		Construct a Shelter (structures and CAD) Linked to industry John Baker – Morrison Shelters (England) Charles Mackintosh – Waterproofing (Scotland)	Food Technology Props for Year 6 Leavers Concert Linked to enterprise and school

				
Final outcome	Create moving product using gears and a pulley in combination	Shelter suitable for industry, wider world	See Food Technology Overview	
Key skills	Gears and a pulley	Cut, join, finish, shape	See Food Technology Overview	
concept focus	Imagine, plan and create Critical thinking and evaluation	Understanding the impact on daily life, the wider world and the cultural wealth of the nation Problem solving	See Food Technology Overview	

Core Concepts

CONCEPT – Critical thinking and evaluation

- Imagine, plan and create
- Develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world
- Critique, evaluate and test their ideas and products and the work of others

CONCEPT – problem solving

- Develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world

CONCEPT – Understanding the impact on daily life, the wider world and the cultural wealth of the nation

- Build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users

CONCEPT – Imagine, plan and create

- Develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world
- Build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users

Progression of skills

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Textiles		<p>Create a textiles product linked to industry.</p> <p>Begin to identify different types and textures of fabric and materials.</p> <p>Be able to thread a needle.</p> <p>Be able to knot a length of thread</p> <p>Be able to use a running stitch.</p> <p>Gain confidence in stitching two pieces of fabric together using a running stitch.</p> <p>Change and modify threads and fabrics by knotting, fraying, fringing, pulling threads, twisting, plaiting.</p> <p>Use appropriate language to describe colours, media,</p>	<p>Create a textiles product linked to home.</p> <p>Apply decoration using beads, buttons, pockets etc.</p> <p>Be able to use a blanket stitch.</p> <p>Show further experience in changing and modifying threads and fabrics, knotting, fraying, fringing, pulling threads, twisting, plaiting.</p> <p>Become competent in using a running stitch.</p> <p>Use appropriate language to describe colours,</p>	<p>Experiment with different fastenings – eg hook and eye, button and loop and select one that is appropriate for their piece of jewellery.</p> <p>Create a piece of jewellery that includes a suitable fastening – linked to industry and culture.</p>	<p>Be able to use a chain stitch.</p> <p>Be able to use back stitch.</p> <p>Be able to create a French knot.</p> <p>Use a number of different stitches creatively to produce different patterns and textures.</p> <p>Demonstrate experience in combining techniques to produce an end piece - linked to home and leisure.</p> <p>Show awareness of the work of others and describe how their work has impacted on the world.</p> <p>Use IT and sketchbooks to collect and record visual information from different sources to inform their ideas.</p>	

		equipment and textures.	media, equipment and textures. Use sketchbooks to create design.			
Mechanisms and mechanical systems	Experiment with making a simple slider and explain how to create it. Create a product that includes a slider – linked to community. Experiment with the mechanism of a simple lever and explain how to create it - linked to gardens and playgrounds.	Become confident in creating both sliders and levers within a single product- linked to community. Use an axle and a wheel mechanism in combination to create a moving product – linked to gardens and playground.	Experiment with creating a more complex lever that uses linkages or a linked lever system. Use language such as fixed, pivot and moving parts to explain how their lever works. Create a product that includes a complex lever – linked to leisure.	Explain what a pulley is, how to use it and have a go at creating one in isolation. Create a product that includes a pulley - linked to the wider world and culture.		Experiment with creating a gear mechanism and explain how to create and use it. Decide on and make an appropriate pulley. Use a pulley and gears mechanism in combination to create a product- linked to the wider world and enterprise.
Structures	Choose suitable structure materials – linked to industry. Practise measuring, cutting and joining materials using appropriate tools e.g. ruler and scissors. Begin to consider the overall finish to the product.	Choose suitable structure materials – linked to garden and playground Explain the purpose of an axle and experiment with making one. Become confident when measuring, cutting and joining materials. Begin to consider the purpose of shape when designing and making a product.	Consider the shape, size and weight of the product that needs packaging. Choose a suitable structure material and consider the effects on the environment – linked to school. Experiment with making 2D nets into 3D shapes. Experiment using a CAD program to create 3D shapes. Experiment with colour choice to create an appealing	Use tools such as a manual drill and saw safely. Consider the shape, size and weight of the product and who it is for - linked to school. Use push and pull tools on a CAD program to identify and alter 3D shapes when designing a product.	Consider the shape, size and weight of the product and who it is for- linked to enterprise. Choose suitable joining methods for a structure product e.g. screws and adhesives. Evaluate the effectiveness of the product for its purpose. Experiment with combining multiple 3D shapes to make a complex 3D model using a CAD program.	Choose suitable materials by considering their specific properties, function durability and sustainability. Use all skills and knowledge to be able to build a suitable structure, explain decisions made and test its effectiveness - linked to industry. Apply knowledge of colour and texture when designing a product using a CAD program. Add labels to a design with using a CAD program.

			design for a target audience. Use tools to change viewpoint and perspective when looking at and designing a product.			
Electrical circuits					Experiment with constructing a simple series electrical circuit including cells, wires, bulbs, switches and buzzers. Create a product using the necessary electrical components – linked to industry and leisure. Consider the product's shape, finish and safety. Use appropriate tools e.g wire cutters.	

Assessment

This has been written using the Design and Technology Association Progression Framework to support our assessment and progression of skills.

Assessment of knowledge will be through ability to understand use and apply knowledge in structures, electrical, textiles, mechanical systems.

CONCEPT – Critical thinking and evaluation

- Develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world
- Imagine, plan and create
- Critique, evaluate and test their ideas and products and the work of others
-

	By the End of Y2	By the end of Y4	By the end of Y6
Expected	<p>I can ask questions and explore existing products – what the products are for, who the products are for, how they work, how they are used, where they might be used, what materials the products are made from, what I like and dislike about the products</p> <p>I can use my own ideas to make something</p> <p>I can explain to someone else how I want to make my product</p> <p>I can describe how something works</p> <p>I can explain what went well with my work</p> <p>I can explain why I have chosen specific materials</p> <p>I can make simple judgements about my products and ideas against the design criteria</p>	<p>I can investigate and analyse who designed the product, where different products were designed and made, when they were designed and made and whether the products can be recycled or reused</p> <p>I can explain how I have improved my original design</p> <p>I can identify the strengths and areas for development in my ideas and products</p> <p>I can use my design criteria to evaluate my completed product</p> <p>I can investigate and analyse how well the products are designed, how well the products are made, why materials have been chosen, what methods of construction have been used, how well products work, how well products achieve their purposes, how well products meet user needs and wants</p>	<p>I can investigate and analyse how well the products are designed, how well the products are made, why materials have been chosen, what methods of construction have been used, how well products work, how well products achieve their purposes, how well products meet user needs and wants</p> <p>I can investigate and analyse the cost of making the product, how innovative products are, how sustainable the materials used in products are and the impact that the product has</p> <p>I can evaluate appearance and function against original criteria</p> <p>I can show that I can test and evaluate my products</p> <p>I can consider the views of others, including intended user, to improve my work</p> <p>I can critically evaluate the quality of the design, manufacture and fitness for purpose for my product as I design and make it</p>

Relevant people/designers	Charles Mackintosh – Waterproofing (Scotland) Emma Parrish- children's book illustrator (sliders) Joel Glickman – K'Nex (USA) Ole Kirk Christiansen- LEGO (Denmark) Margaret Steiff - Stuffed toys (Germany)	Isaac Singer – (USA) Robert Gair- (Scottish) Joel Glickman – K'Nex (USA) Elisha Otis – elevator pulley (Canada) Ole Kirk Christiansen- LEGO (Denmark) Paloma Picasso - jewellery designs for Tiffany & Co (France)	John Spinello - Operation game (USA) Hella Jongerius –chairs (Netherlands) Lucienne Day- Embroidery (England) William Morris - Embroidery (England) Joel Glickman – K'Nex (USA) John Baker – Morrison Shelters (England) Charles Mackintosh – Waterproofing (Scotland)
